PROFESSIONAL PROFILE

Computer Systems Engineer and Fullstack Developer with more than 6 years of specialized experience designing, developing, and implementing scalable microservice and microfrontend architectures. Strong command of the Java ecosystem (Spring Boot, Spring Cloud) and PHP (Laravel), combined with modern frontend development in Angular. Proven experience leading critical projects in the public and private sectors, implementing distributed solutions, asynchronous messaging (Kafka), serverless environments (AWS Lambda), and performance optimization (JMeter). Professional focused on agile methodologies, continuous delivery, and software engineering best practices. Available for international relocation under visa sponsorship in Spain.

TECHNICAL SKILLS

- **Programming languages:** Java, PHP, JavaScript, TypeScript.
- **Backend frameworks:** Spring Boot, Spring Cloud, Laravel (v11), NestJS.
- **Frontend frameworks:** Angular (v17), JSF, Laravel Blade.
- **Databases:** PostgreSQL, MySQL.
- **Infrastructure and tools:** AWS Lambda (Serverless), Apache Kafka, Docker, Git, GitHub, RedHat Linux servers, JBoss EAP, JMeter (load testing).
- **Methodologies:** Scrum, GitFlow, Continuous Integration (CI/CD).

PROFESSIONAL EXPERIENCE

Information Systems Analyst 2 | Council of the Judiciary (Ecuador) | October 2025 – Present

- Design and execution of methodological phases for the software lifecycle under robust Microservice architectures with Spring Boot and Microfrontends with Angular.
- Strategic participation in operational plans for the successful implementation and rollout of new critical modules in the judicial system.

Fullstack Developer Consultant (Project contract) | Ministry of Telecommunications (Ecuador) | July 2025 – September 2025

- End-to-end development and delivery of scalable microservices using Laravel, improving the efficiency of several ministerial applications.
- Design and optimization of relational database schemas with PostgreSQL.
- Construction of professional user interfaces using Laravel/Blade.

Software Development Projects Expert | Council of the Judiciary (Ecuador) | February 2024 – June 2025

- Responsible for evolutionary maintenance and development of corporate microservices based on Java and Spring Boot.
- Design and development of modern, dynamic, and responsive user interfaces using Angular 17.
- Deployment and orchestration of microservices with Spring Cloud, ensuring a distributed and secure architecture on RedHat Linux servers.
- Implementation of automated load, stress, and performance tests with JMeter, ensuring high system availability.

Fullstack Software Engineer (Project contract) | Ministry of Economic and Social Inclusion (Ecuador) | August 2023 – December 2023

- Corrective and evolutionary maintenance of the critical agreements system for social protection and early childhood development programs.

- End-to-end development of the "COMITÉS" system, implementing backend microservices and modular Angular components for the frontend.

Software Development Analyst (Project contract) | Secretariat of Intercultural Bilingual Education (Ecuador) | February 2023 – July 2023

- Design, coding, and standardized implementation of technical requirements for the strategic KIPUJEA and CESLI systems.
- Execution of functional tests (unit and integration) to ensure code quality and stability before production.
- Preparation of detailed technical documentation of the developed architecture.

Associate Backend Developer | TRADE EC (Ecuador) | February 2022 – February 2023

- Development and optimization of efficient microservices using PHP (Laravel) and Node.js (NestJS).
- Creation of serverless services using AWS Lambda, reducing infrastructure costs and deployment times.
- Technical leadership of the critical API Gateway migration from Netflix Zuul (Java) to Amazon API Gateway.

Fullstack Application Developer | Latitude Foundation (Ecuador) | January 2019 – January 2022

- End-to-end development of electronic invoicing and grade-control systems using Spring Boot, Laravel, and Angular.
- Quality assurance through performance audits and stress tests with JMeter.

EDUCATION

- Bachelor's Degree in Computer Systems Engineering | Universidad Técnica del Norte (Ecuador), graduated in 2020.
- Associate Degree in Commerce and Administration (Informatics) | Instituto Tecnológico Otavalo (Ecuador), graduated in 2013.

LANGUAGES

- Spanish: Native.
- Kichwa: Native.
- English: B1 (Intermediate / professional technical).

ADDITIONAL TRAINING

- Professional Git and GitHub course.
- Design Thinking applied to product development.
- IT customer service and user support course.
